The curatorial process is never easy, but it's especially hard when it's as personal as this. This exhibition is about 100 years of my work that I've done. It's taking everything apart, sorting through it, and creating a new order with it. I'm trying to figure out how to make something new from this raw material. I've always thought of myself as a lonely person, because I don't have any friends who are into this kind of stuff. As for friends who do, they would say, "Come on, this is your thing, show me what you're doing!" My friend Robert Huber, a photographer in San Francisco, introduced me to the show at 56th and Ninth. I saw the PDF file of the online catalogue. It was very organized and illustrated very clearly. When you look at an online catalogue, you're looking at a person's work, but if you're looking at a catalogue for an exhibition, you're looking at a curator's work. I've been to a lot of shows where there's a lot of showboating and where you really don't know what's going on in your own work until you see it. This show is about feeling with the work, knowing what's in it. You can't just leap into a museum show, looking for inspiration. I call the show "What Am I Doing Here?" That's the first word in a song by the Pixies, a song I've really been listening to. Main menu Neo-Nazi Donations to German Elector Are Reported German voters have re-elected Angela Merkel as their chancellor, after a nail-biting election that left no party with a majority in parliament. Merkel's centre-right Christian Democrats retained their majority of 170 seats to 150 for the centre-left Social Democrats, making her party Germany's largest. Both have been accused of accommodating neo-Nazis. Her CDU/CSU party has been dogged by its stance on immigration. Merkel has so far not commented publicly on the donation, and has not ruled out accepting the person's donation again if she returns to power at the next election.

A wild and woolly web of intrigue: the life and career of the controversial neurobiologist and her teacher, Karl Lashley. The life and career of the neurobiologist Karl Lashley, an innovator in the field of mammalian neuroanatomy and neurophysiology, is highly unusual and provides a much overlooked example of scientific creativity and resistance to convention. This paper describes, through archival research, the life of Lashley in his youth and his career as a neurophysiologist from early in the 1920s until his death in 1960. Throughout, the paper contrasts Lashley's diverse and sometimes contradictory work with the work of the well-established morphologist and neuroanatomist John Hughlings Jackson (1835-1911) and the related work of his students. The paper then focuses on Lashley's early work in the field of neurophysiology in the 1920s and 30s, and his attempts in this domain to challenge Jacksonian theoretical assumptions about the relationship between the structure and functions of the brain.

If you're tired of the typical Disney restroom, you're in luck! Disney has been adding some new and different restrooms and tiled restrooms to the park since 2014. Some of the new tiled restrooms feature multiple washrooms (or even a room where you can meet your children's classmates), while others feature something as silly as a splash playground. Of course, Mickey's Hidden Rooms provide a bit of mystery for guests who find themselves in one of them. Do you know what it takes to find all of the Secret Mickeys hidden in the park? More importantly, would you even want to? Disney has invested an incredible amount of resources into providing guests with a comfortable and clean bathroom experience. Even if you're not
